

HUMAN DEVELOPMENT INDEX (HDI) REPORT

Socioeconomic Predictive Well-Being Assessment

1. Assessment Summary

This official evaluation report details the socioeconomic metrics and predicted Human Development Index (HDI) rating. The score is computed using standard StandardScaler normalization and a Multiple Linear Regression model trained on global country records.

Predicted HDI Value:

0.736

Development Classification Tier:

High Human Development

2. Input Indicators Profile

Socioeconomic Dimension / Indicator	Assessed Input Value
Life Expectancy at Birth	69.73 years
Expected Years of Schooling	13.62 years
Mean Years of Schooling	10.19 years
Gross National Income per Capita (PPP)	\$17,101.86

3. Targeted Development Recommendations

*** Focus on Innovation & High Tech**

Transition from manufacturing-driven industries to knowledge-based services and high-value innovations.

*** Reduce Economic Inequality**

Ensure that wealth gains are shared equitably across regional divisions and socio-economic demographics.

*** Promote Sustainable Development**

Adopt eco-friendly infrastructure and clean energy (wind, solar) to transition away from carbon-heavy production.

*** Expand Higher Education Access**

Increase subsidies and scholarship options for tertiary education and advanced vocational programs.
